Experiment - 6

Payroll Processing System Using Zoho One (SaaS)

Aim

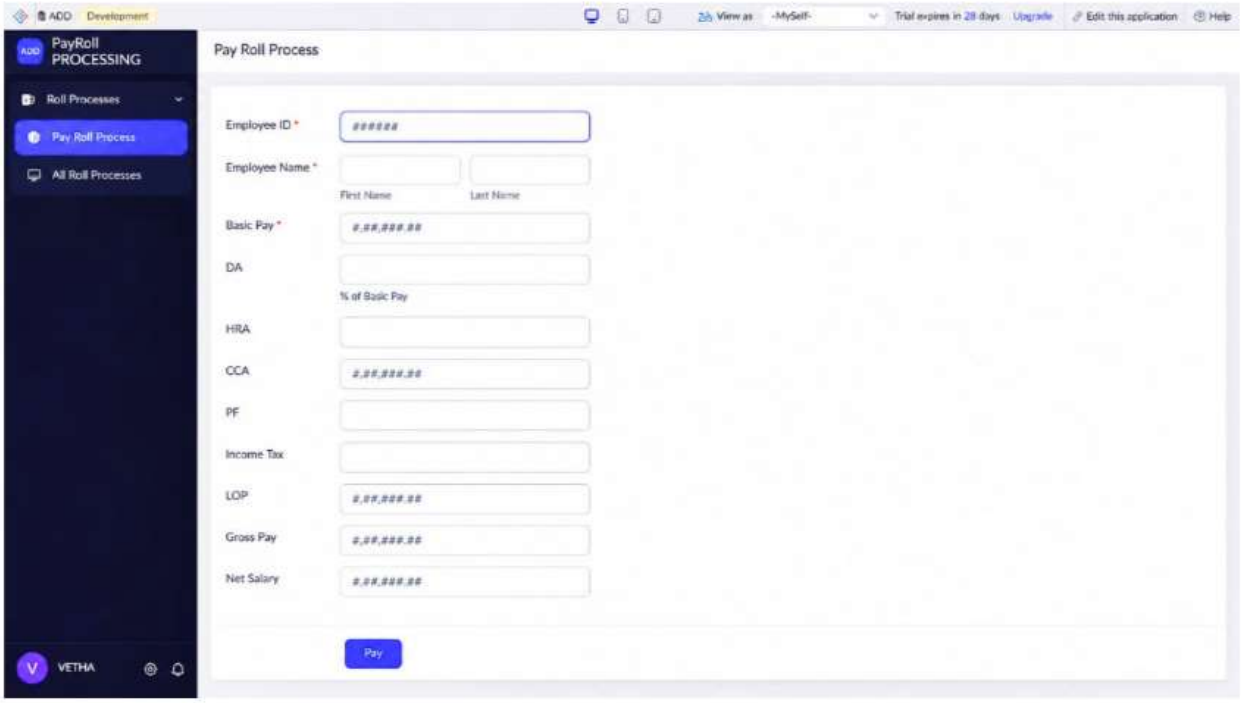

To create a cloud-based **Payroll Processing System** using **Zoho One / Zoho Creator** to calculate employee salary components and demonstrate **Software as a Service (SaaS)**.

Procedure

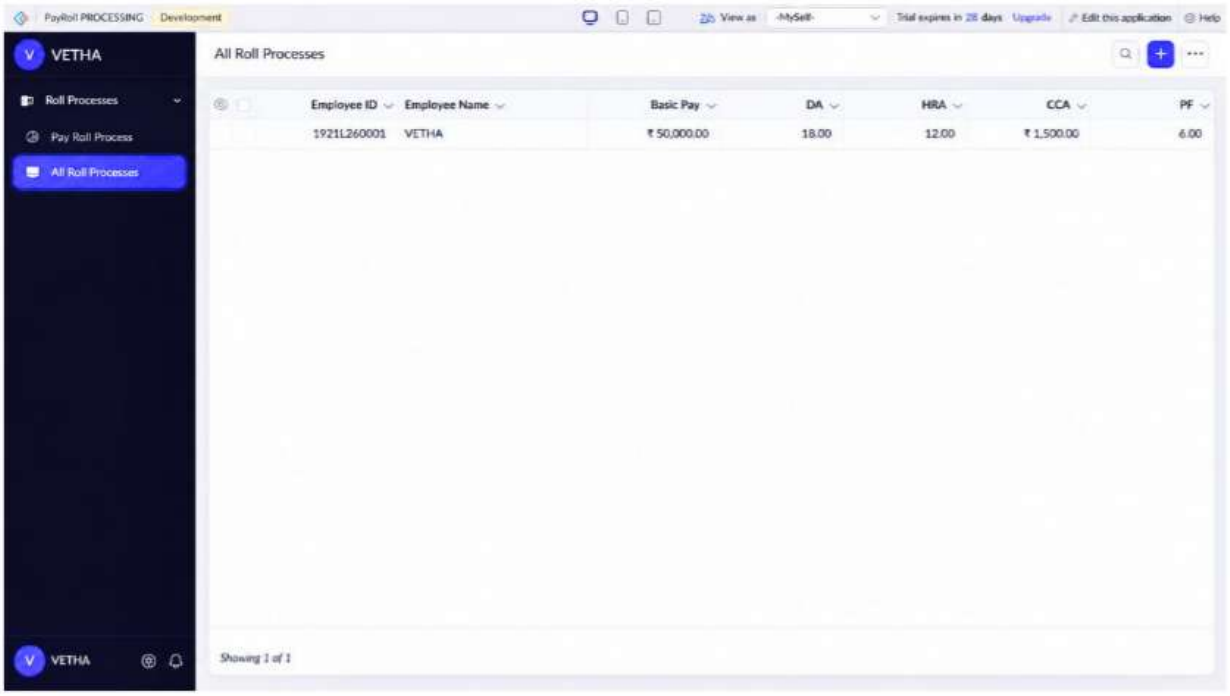

1. Log in to **Zoho One**.
2. Open **Zoho Creator**.
3. Create a new application named **Payroll Processing System**.
4. Create a form named **Payroll Processing**.
5. Add the required employee and salary fields.
6. Enter the employee's **Basic Pay**.
7. Enter the applicable **DA, HRA, CCA and PF** values.
8. Create a workflow to automatically calculate the salary.
9. Calculate the **DA amount** from the Basic Pay.
10. Calculate the **HRA amount** from the Basic Pay.
11. Calculate the **Gross Pay**.
12. Calculate the **PF deduction**.
13. Calculate the **Net Pay**.
14. Save and execute the Deluge script.
15. Enter sample employee details.
16. Submit the form.
17. Verify that the Gross Pay and Net Pay are calculated automatically.
18. Verify the submitted employee record in the cloud.

Implementation

Input:

Output:

Result

Thus, the **Payroll Processing System** was successfully created using **Zoho One / Zoho Creator**, and the employee's **Gross Pay and Net Pay** were automatically calculated using Deluge scripting, demonstrating **Software as a Service (SaaS)**.
