Experiment - 7

Students Attendance System Using Zoho One (SaaS)

Aim

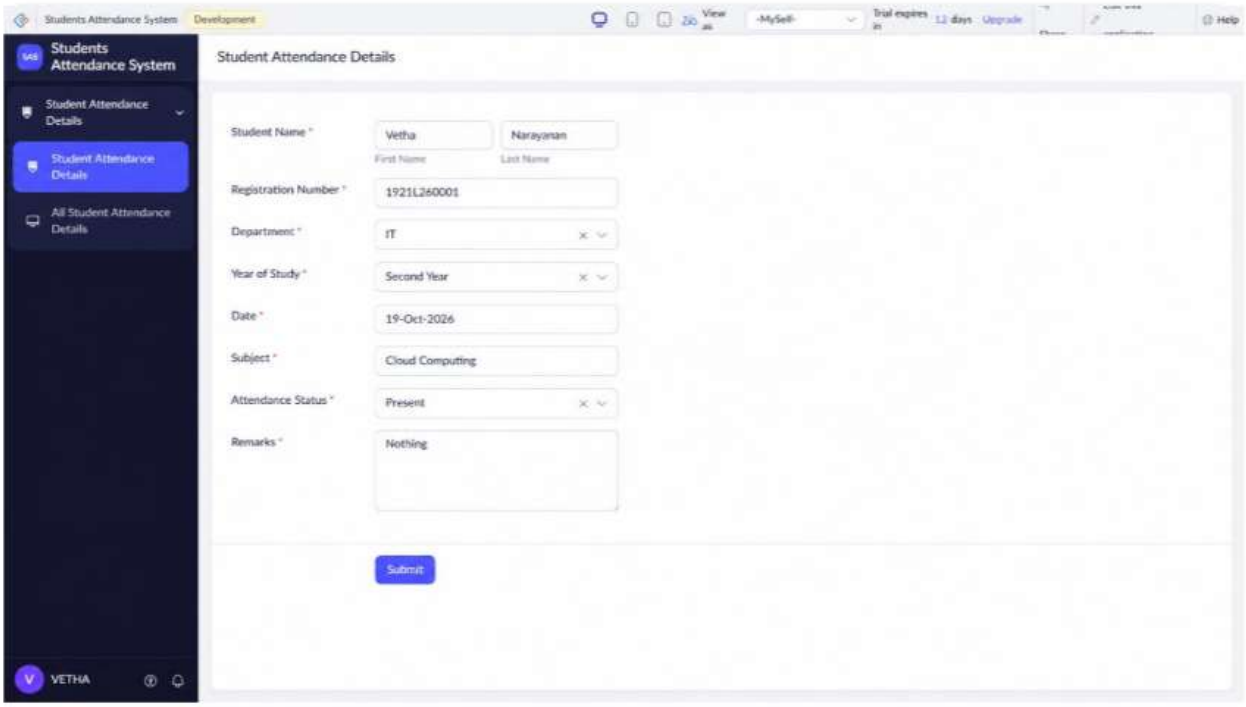

To create a cloud-based Students Attendance System using Zoho One / Zoho Creator to record and manage student attendance details and demonstrate Software as a Service (SaaS).

Procedure

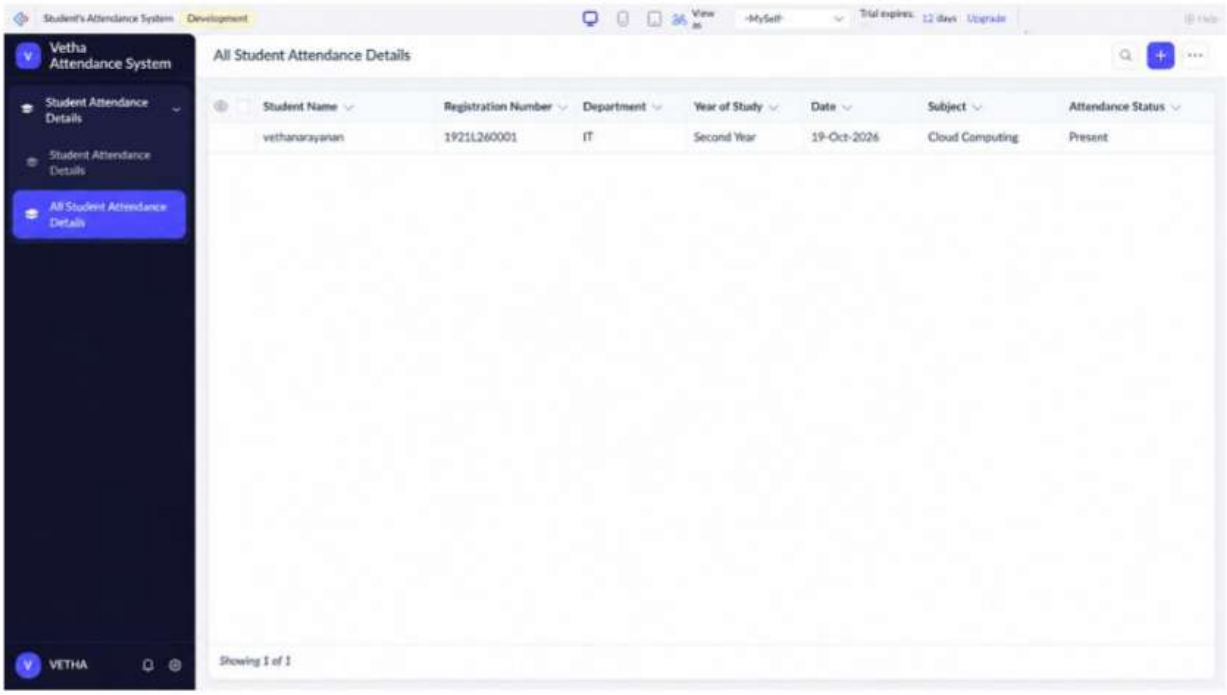

1. Log in to the Zoho One account.
2. Open Zoho Creator from the applications menu.
3. Create a new application named Students Attendance System.
4. Create a form named Student Attendance Details.
5. Add the following fields to the form:
    1. Student Name – Single Line
    2. Registration Number – Single Line
    3. Department – Dropdown
    4. Year of Study – Dropdown
    5. Date – Date
    6. Subject – Single Line
    7. Attendance Status – Dropdown
    8. Remarks – Multi Line
6. Configure the Department dropdown with options such as CSE, AIML, IT, ECE, and EEE.
7. Configure the Year of Study dropdown with options such as First Year, Second Year, Third Year, and Fourth Year.
8. Configure the Attendance Status dropdown with options Present, Absent, and On Duty.
9. Arrange the fields properly to make the form user-friendly.
10. Save and publish the form.
11. Enter sample student attendance details.
12. Submit the form and verify that the attendance data is stored in the cloud.
13. Open the report section to view the submitted attendance records.
14. Test the form by entering attendance details for different students and dates.
15. Verify that the system can be accessed through the cloud using Zoho Creator.

Implementation

Input:

Output:

Result

Thus, the Students Attendance System was successfully created using Zoho One / Zoho Creator. The application records and manages student attendance details in the cloud, demonstrating the Software as a Service (SaaS) model.
