Experiment -3

Flight Reservation System Using Zoho One (SaaS)

Aim

To create a **Flight Reservation System** using **Zoho One** as a cloud-based **Software as a Service (SaaS)** application.

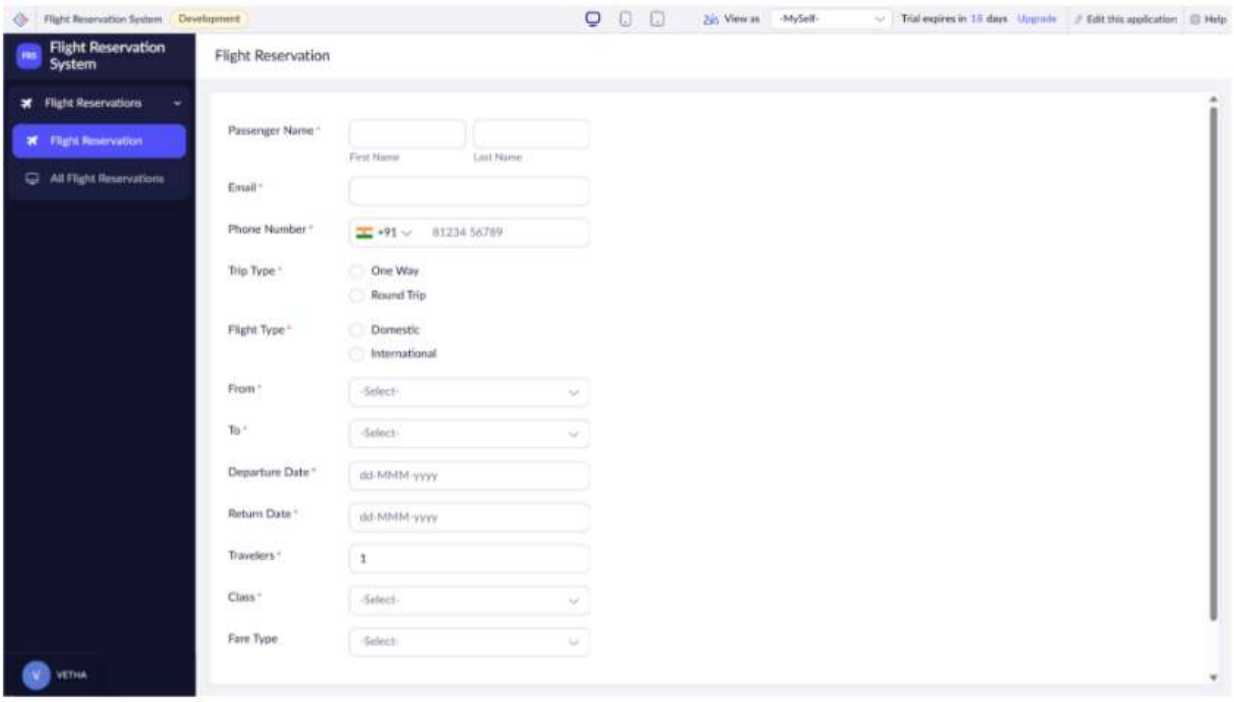

Procedure

1. Log in to the **Zoho One** cloud platform.
2. Open **Zoho Creator** from the Zoho One applications.
3. Create a new application named **Flight Reservation System**.
4. Create a new form named **Flight Reservation**.
5. Add the required fields:
    1. Passenger Name
    2. Email
    3. Phone
    4. Trip Type
    5. From
    6. To
    7. Departure Date
    8. Return Date
    9. Travelers
    10. Class
    11. Fare Type
    12. Flight Type
6. Configure the field types according to the data required.
7. Add **One Way** and **Round Trip** options under Trip Type.
8. Add **Domestic** and **International** options under Flight Type.
9. Add **Economy, Premium Economy, Business, and First Class** options under Class.
10. Add **Regular, Student, and Senior Citizen** options under Fare Type.
11. Add suitable departure and destination locations.
12. Configure the **Departure Date** and **Return Date** fields.
13. Add the required number of travelers.

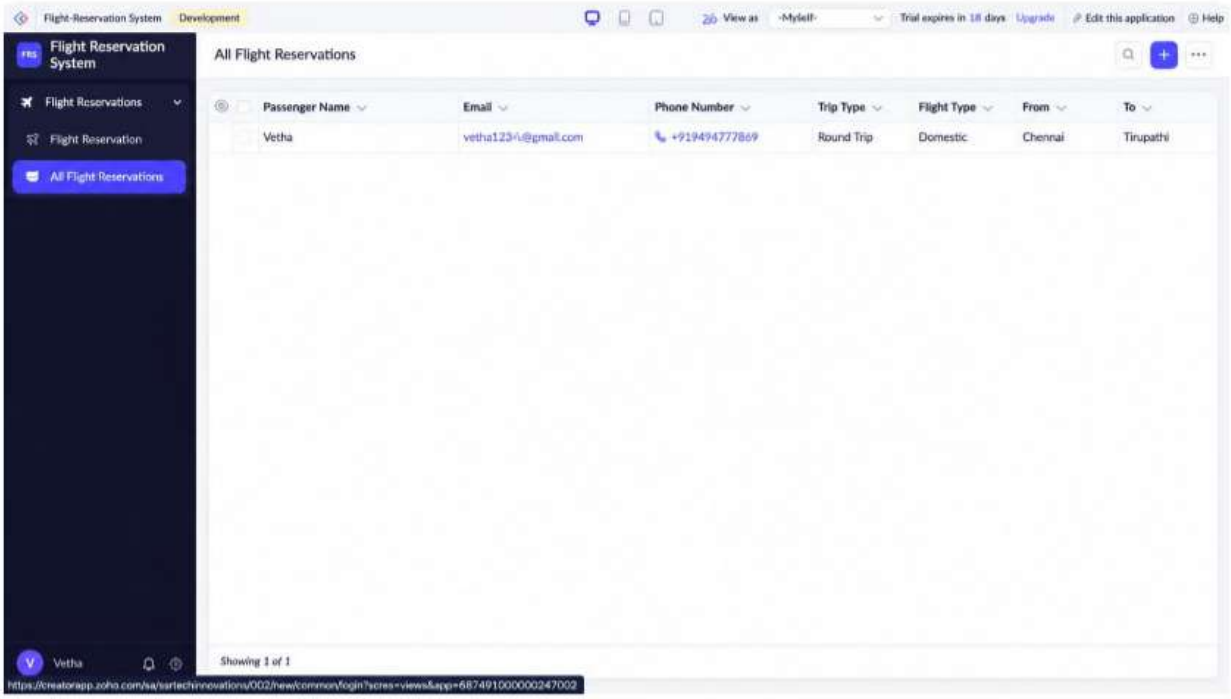

14. Design and arrange the form for easy user interaction.
15. Save and publish the form.
16. Enter sample flight reservation details into the form.
17. Submit the form and verify that the entered data is stored in the cloud.
18. Open the report and verify the submitted flight reservation record.
19. Test the application by entering different **One Way, Round Trip, Domestic, and International** flight details.
20. Verify that the **Flight Reservation System** works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a **Flight Reservation System** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
